WEB DEVELOPMENT

ACTIVITY-BASED LEARNING (ABL)

CONSOLIDATED PROJECT REPORT

Three Website Case Studies

Student Name	M. Naga Sidhu
Roll Number	26000042
Branch & Section	CSE-CORE & Section-1

Case Study 1	7. Electronics Store Website
Case Study 2	9. Bakery and Cake Shop Website
Case Study 3	6. Online Shopping Websit

Prepared from the supplied assignment instructions, HTML source files and browser screenshots.

Assignment Overview

This report consolidates three website case studies for the Web Development Activity-Based Learning assignment. The supplied assignment instructions ask students to develop three webpages, upload the projects and one consolidated PDF containing screenshots to a GitHub repository named **WD-Activity-Based-Learning**, and maintain a README.md with student details and selected case-study titles.

Student details

Name: M. Naga Sidhu
Roll Number: 26000042
Branch & Section: CSE-CORE & Section-1

Project files

- **wed develo task-1.html** — Vinland Electronics Store
- **wed develo task-2.html** — Vinland Cafe & Restaurant
- **web develo task-3.html** — Vinland Shopping Store

Technologies and shared design

HTML structures each webpage. CSS provides layout, colours, typography, cards, spacing, hover effects and responsive styling. Interactive controls reference JavaScript functions where implemented. The pages share a warm palette of dark brown, medium brown, cream and beige, with serif headings and sans-serif body text.

1. Vinland Electronics Store

Source file: wed develo task-1.html
Purpose: An electronics storefront for browsing laptops, smartphones, audio products and smart accessories.

Main features

• Header with store name and technology-focused tagline.

• Navigation for Home, Categories, Products, Compare, Offers, Contact and Cart.

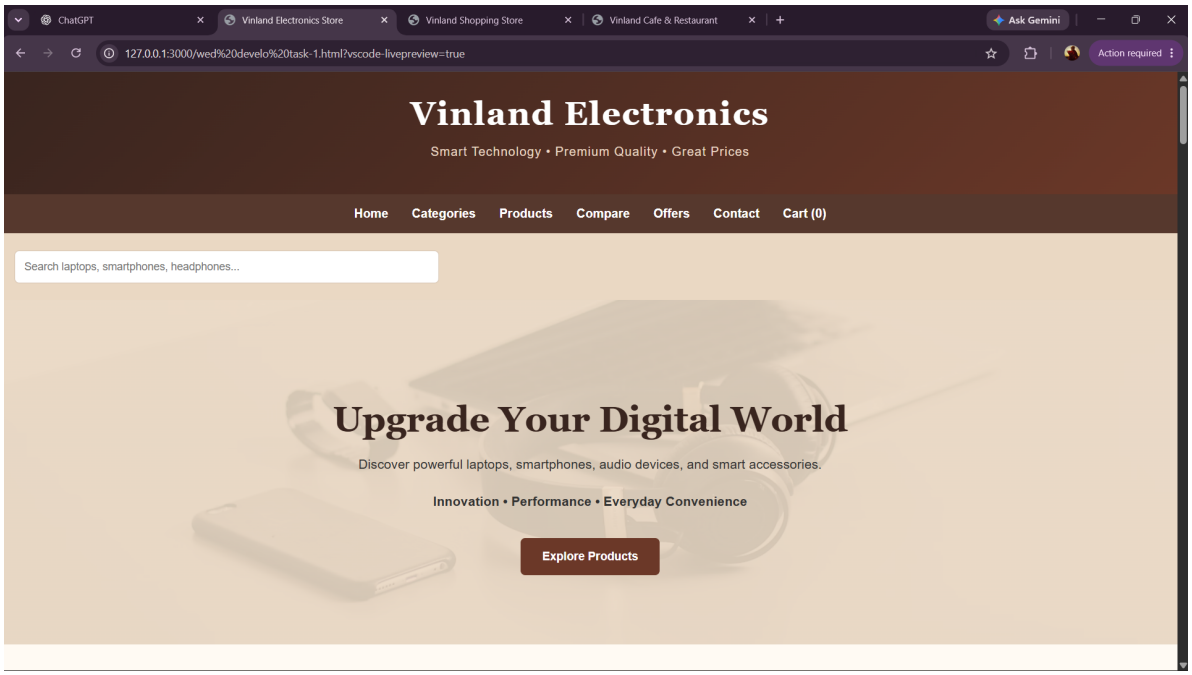

• Search input and category controls.

• Product cards with descriptions, example specifications, ratings, prices and discounts.

• Cart and product-detail controls, plus comparison, offers and contact sections.

• CSS hover effects, sticky navigation and responsive layout.

Implementation note: Verify that JavaScript functions for search, filtering, cart updates and product details are implemented before describing those controls as fully functional.

2. Vinland Cafe & Restaurant

Source file: wed develo task-2.html
Purpose: A cafe website presenting its menu, chefs, restaurant ambience, reviews, opening hours, location and table reservation form.

Main features

• Navigation for Home, Menu, Our Chefs, Reviews and Reservation.

• Hero section with a menu call-to-action.

• Menu cards for Italian Pizza, Classic Burger, Hot Coffee and Chocolate Icecream with prices.

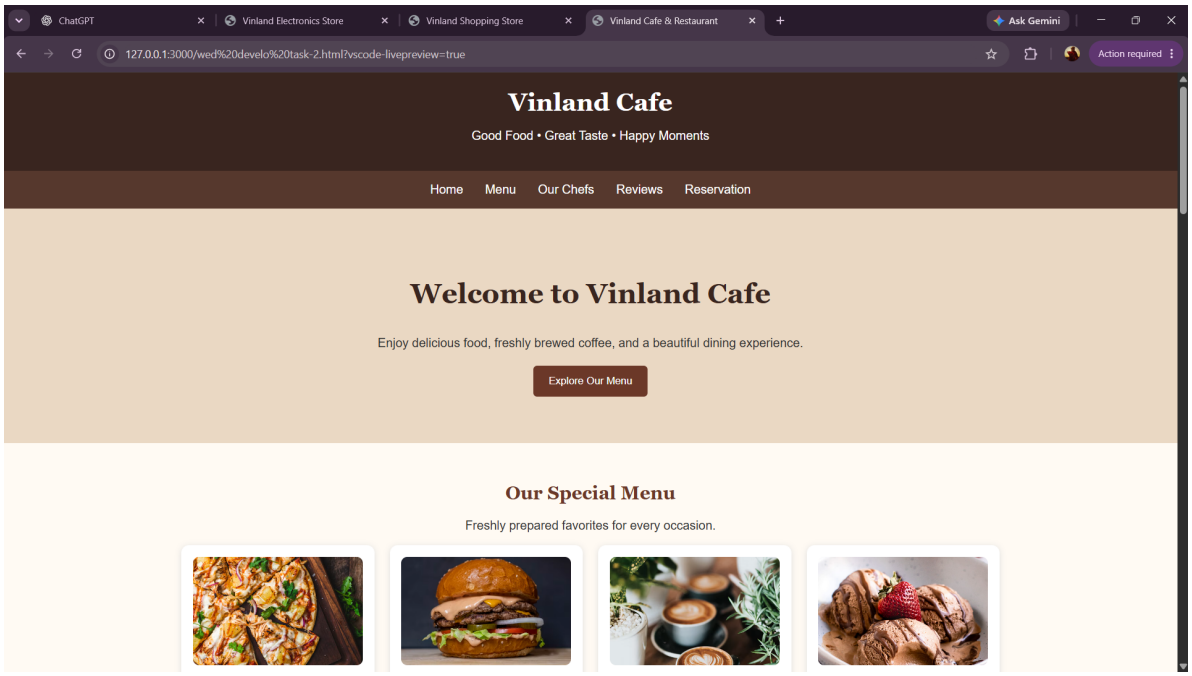

• Chef profiles and restaurant ambience images.

• Customer reviews, opening hours and location information.

• Reservation form with name, email, date, time and guest-count fields.

• Responsive styles for smaller screens.

Implementation note: The HTML references a local image named chocolate-icecream.jpg. Include it in the correct folder or update the image path. Verify the reservation submit handler if booking confirmation is expected.

Browser screenshot: Vinland Cafe & Restaurant.

3. Vinland Shopping Store

Source file: web develo task-3.html
Purpose: A general shopping storefront for electronics, fashion and accessories.

Main features

• Header and navigation for Home, Categories, Products, Offers, Contact and Cart.

• Search box and welcome hero section with Shop Now call-to-action.

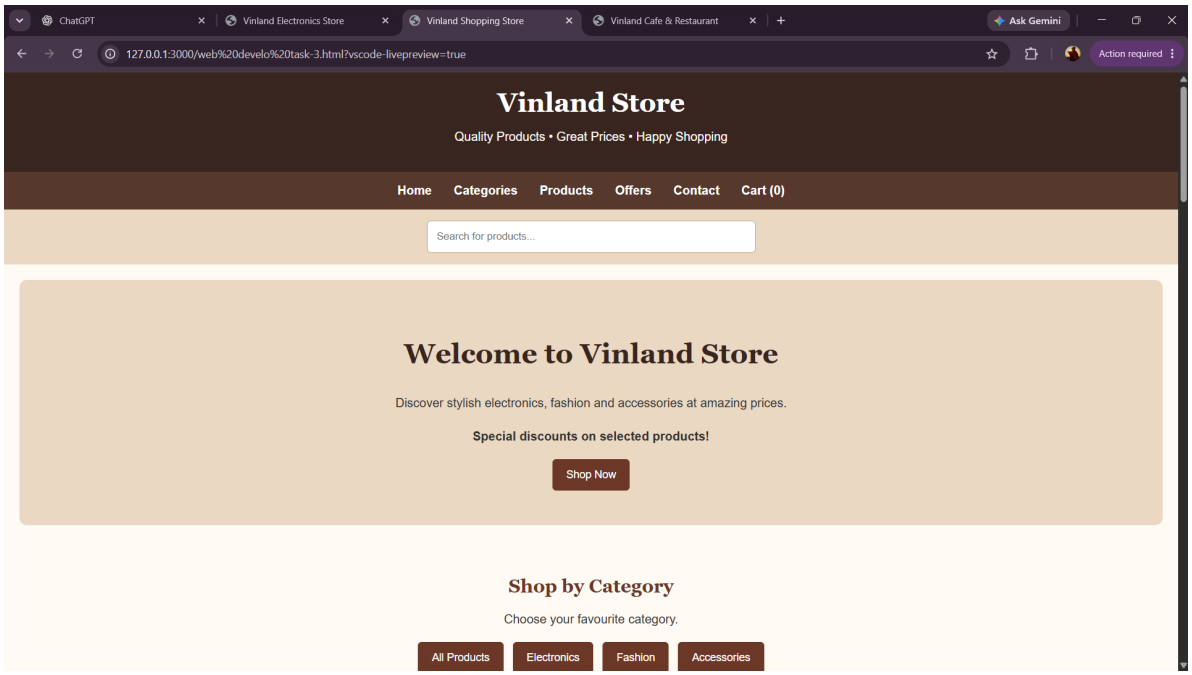

• Category buttons for All Products, Electronics, Fashion and Accessories.

• Product cards with images, descriptions, ratings, discounts, prices and cart buttons.

• Special offers, contact information and footer.

• Flexbox layouts, rounded cards, shadows and responsive styling.

Implementation note: Check that JavaScript functions such as filterProducts() and addToCart() are implemented and connected before demonstrating the controls.

Testing and Submission Checklist

Suggested checks before submission

■ Open each HTML file and confirm the page loads without layout errors.

■ Test navigation links and call-to-action buttons.

■ Test search and category filters, where implemented.

■ Test Add to Cart and View Details controls, where implemented.

■ Confirm all images load and local assets are stored in the correct folder.

■ Resize the browser to check responsive layout.

■ Confirm the student details in this PDF and README.md are correct.

■ Upload the three HTML projects, any local assets, the consolidated PDF and README.md to WD-Activity-Based-Learning.

■ Submit the repository URL to the Web Development faculty member or Lab Mentor as instructed.
